

Consultant profile - Jonas Dalesjö

Jonas is a driven developer with a passion for UI and UX design. He's a quick learner that values clean and structured code and thrives in challenging environments.

Technologies

HTML, CSS, SCSS, JavaScript, TypeScript, React, React Native, Redux, Jest, Enzyme, GraphQL, NodeJS, Webpack, Wordpress, PHP, Laravel, Ruby, Ruby on Rails, Angular, MongoDB, SQL

Education

Bachelor of Science, Information Systems Programme, Linneaus University 2010-2013

Projects

Shinner (personal project) 2019-ongoing

Jonas is building a **React Native** mobile application together with a friend who is a UX designer, which aims to map the world of skateboarding. So far they've released the app to the App Store and collected 5000+ skateparks and street spots worldwide.

Assignments

Bredbandsval.se (One Agency) 2019-2020

Jonas implemented a new design and created reusable components in **React**. His responsibilities stretched from **UI and UX design** to implementing backend functionality in **NodeJS**.

Bonnier News Next (One Agency) 2019

Jonas worked in a Google financed innovation project where the task was to develop a new app for a personalized news experience. Jonas responsibility was to build a backend in **NodeJS** and **MongoDB** that served the mobile app.

Tunstall (One Agency) 2017-2019

Jonas worked in a project to create Tunstalls new platform for Internet of Things, which integrated with the company's other systems. He also developed a web app which visualized data from elderly security alarms in a responsive web app for relatives. Among the technologies used were **React**, **TypeScript**, **Jest/Enzyme**, **GraphQL** and **NodeJS**.

Nilson Group (Knowit) 2017

Jonas was part of an in-house team at Knowit eCommerce where he was responsible for maintaining and developing the frontend of Nilsons e-commerce store Feet First, as well as a brand site for Vagabond. Both sites were built with **EpiServer** and **jQuery**.

AktiInvest (Knowit) 2016

Jonas was the lead frontend developer for AktiInvests platform for equities trading which was built upon **jQuery**. He was also responsible for **UI and UX design** when new features were developed.

H&M (Knowit) 2016

Jonas was part of an international team consisting of three frontend developers in Stockholm and four backend developers in India. Together they created the new corporate web for H&M which, among many other things, consisted of brand presentations, investor relations and image galleries for journalists and media. The platform was built upon **Adobe Experience Manager** and **jQuery** for the frontend.

BankGiro (Knowit) 2015

Jonas worked as a frontend developer in a in-house team at Knowit which developed a new service for BankGiro. Technologies used were [ASP.NET](#) and **AngularJS**. Jonas was also responsible for **UI and UX design**.

GoBrave 2013-2014

Jonas was employed by advertising agency GoBrave where he built numerous campaign- and company sites using **Wordpress**. He also developed more customer specific solutions using **Lavarel**, **Ruby on Rails** and **Angular**.
